Good to know

The combination of the highest quality materials and structural features allows Bahama to guarantee the wind stability of its products, depending on the model, up to 130 km/h. In addition to the technical details of an parasol it is especially the lightfastness of the fabrics' colors, the waterproofness and grammage as well as the water column of the textile membranes which are decisive. Trust is placed in Bahama by luxury hotels such as the Burj Al Arab in Dubai, the Hotel Sacher in Vienna and the Dalí Museum in St. Petersburg, USA.

Service

Proper service greatly influences the life span of an parasol. The exchangeable textile membrane of a parasol can – after being exposed to all sorts of weather conditions for years – be cleaned or replaced. Our service makes a full technical and general overhaul of the product such that they not only look attractive, but can defy the strongest of winds.

Careful and individual planning

Installation of new parasols

Fitting of new textile membranes

Worldwide installation with Bahama technicians

Schooling of personnel (handling the parasols)

Schooling of customer technicians
