

Trieste Key Features

- ❖ Made with a single-piece bamboo mast for extra strength and durability
- ❖ Excellent “Green” credentials – Bamboo has a high CO2 absorption and is sourced from sustainable forests, thus minimising the effect on the environment
- ❖ Bamboo has a higher density than Teak
- ❖ Mast and frame finished smooth
- ❖ Resistant to warping, splitting, rot, mould and mildew
- ❖ No splinters or leaching
- ❖ Double pulley and rope system ensures easy raising and lowering of the canopy
- ❖ The moving hub is turned with stainless steel brackets
- ❖ An elegant bamboo finial finishes off the parasol
- ❖ The covers are attached using bolt-down stainless steel rib end protector system
- ❖ Thick “spuncrylic” and solution-dyed acrylics are employed for the membranes (fabrics)
