

GATE SHADE

Architectural Shade Structure

An iconic automated shade structure combining a sculptural steel arch, substantial coverage and integrated technology for premium outdoor environments.

UP TO 5 × 6.4m

Substantial shade coverage

TWIN AWNINGS

Motorised remote control

AUTOMATED SAFETY

Wind-sensing closure

ARCHITECTURE & CONSTRUCTION

- Iconic shade structure combining effective sun protection with distinctive architectural originality
- Elegant steel arch is available in a choice of colours to complement its surroundings
- Internal steel supporting structure provides a strong foundation for the integrated shade system
- Two motorised awnings are housed discreetly within the central architectural arch

AUTOMATED SHADE SYSTEM

- Remote-controlled operation allows both awnings to be deployed and retracted conveniently
- Provides substantial shade coverage across an area of up to 5 × 6.4 metres
- Available in square and rectangular canopy configurations
- Choice of approximately 25 standard fabric colours for coordinated project specification

COMFORT & WEATHER CONTROL

- Integrated LED lighting gently illuminates the area beneath the structure after dark
- Optional personalised audio system creates a more complete outdoor hospitality environment
- Anemometer closes the canopies automatically when winds exceed approximately 25–28km/h
- Optional rain sensor provides automatic canopy closure during adverse weather
