

JUMBRELLA

Wind-Certified Parasol

The original German-engineered Jumbrella, combining certified wind performance, robust structure and straightforward hospitality operation.

3-6 METRES

Heavy-duty canopy range

WIND CERTIFIED

Demanding locations

ANTI-THEFT

Integrated lever feature

CERTIFIED COMMERCIAL DESIGN

- The original German-engineered Jumbrella commercial parasol, manufactured by Bahama
- Fully wind-certified construction for demanding hospitality and exposed outdoor environments
- Heavy-duty canopy sizes ranging from 3 to 6 metres
- Large extruded mast provides substantial structural strength and stability

ENGINEERING & OPERATION

- Double support-strut system reinforces the spokes and increases resistance to wind loading
- Tensioned canopy fabric improves wind resistance and helps prolong the membrane's working life
- Simple lever-operated opening system incorporates an integrated anti-theft feature
- Telescopic mechanism allows the canopy to close above standard-height tables and furniture

FABRIC & INSTALLATION

- Stainless-steel fittings are used throughout for strength and corrosion resistance
- High-strength, densely woven polyester canopy is water-repellent and highly UV resistant
- Available in 25 fabric colours, with permanent and mobile installation options
- Optional linking gutters allow adjoining parasols to be linked for more continuous weather protection

EXPERT PROJECT SUPPORT

Morton Parasols can advise on specification, configuration, installation and suitable optional equipment for the intended location.
