LARGO PARASOL FABRICS 2026

# Largo Fabric Performance

Commercial membrane engineered for permanent outdoor installations

THE HEART OF THE FABRIC

## PVC-coated polyester, 550 Dtex

Serge Ferrari Preconstraint coating technology provides a stable, lightweight membrane designed to remain tensioned without folds.

CORE SPECIFICATION

|                        |                                                |
|------------------------|------------------------------------------------|
| Material               | PVC-coated polyester, 550 Dtex                 |
| Fabric system          | Serge Ferrari Preconstraint coating technology |
| Grammage               | Approximately 480 g/m <sup>2</sup>             |
| Thickness              | 0.36 mm                                        |
| Waterproofing          | Heat-sealed membrane; 100% waterproof          |
| Fire performance       | Fire retardant - DIN 4102-B1                   |
| Lightfastness          | 7/8 - DIN EN ISO 105-B02                       |
| Temperature resistance | -30°C to +70°C - DIN EN 1876                   |

DESIGNED FOR DEMANDING OUTDOOR USE

DURABLE & WEATHER-RESISTANT

Exceptional surface stability and tear resistance, with reliable performance across changing weather conditions.

DIRT-REPELLENT

The surface supports easier cleaning of deposits from foliage, bird droppings, vehicle exhaust and dust.

CONSISTENT TENSION

Engineered to maintain a smooth, fold-free canopy and particularly suited to permanently opened parasols.

LIGHT & SOLAR PERFORMANCE

Low-weight construction, excellent sun protection, high light transmission and strong fabric lightfastness.

RESPONSIBLE MATERIAL

The fabric is fully recyclable.
