

LARGO

Architectural Shade Structure

A monumental tulip-inspired shade structure engineered for prestigious civic, religious and major public environments.

6–10 METRES

Monumental dimensions

UP TO 130km/h

Exceptional wind rating

800–2,350kg

Substantial construction

CIVIC SCALE & PRESENCE

- Monumental architectural shade structure designed for prestigious municipal and public environments
- Suitable for government buildings, religious sites, stadiums and other large civic spaces
- Available in imposing dimensions ranging from 6 to 10 metres
- Distinctive canopy opens upwards into an elegant, tulip-inspired form

ENGINEERING & OPERATION

- Engineered for exceptional strength and wind speeds of up to 130 km/h
- Substantial construction, with model weights ranging from approximately 800 to 2,350kg
- Concealed engineering keeps most technical components hidden within the structure
- Clean central-column cladding creates a refined and uncluttered appearance

MEMBRANE & ILLUMINATION

- Telescopic system provides controlled and dependable canopy operation
- May be opened manually using a crank handle or fitted with an optional motor drive
- High-performance Ferrari PVC fabric provides a durable architectural membrane
- Optional interior and indirect LED lighting creates an impressive illuminated feature after dark
