

SCHATTELLO

# The UK’s Leading Commercial Parasol

Engineered for demanding hospitality terraces, with commercial-grade construction, refined operation and a comprehensive choice of sizes, fabrics and accessories.

UP TO 6 METRES

Extensive canopy range

COMMERCIAL GRADE

Built for hospitality use

TAILORED SYSTEM

Permanent, mobile or offset

ENGINEERING & DURABILITY

- Heavy-duty structure developed specifically for demanding commercial environments.
- High wind ratings supported by a substantial mast and reinforced, toughened-aluminium spokes.
- Spring-loaded spokes maintain fabric tension, limit movement and help prolong canopy life.
- Stainless-steel fittings provide dependable strength and resistance to corrosion.

OPERATION & INSTALLATION

- Removable crank handle provides smooth operation and can be stored securely after use.
- Telescopic closing system allows the canopy to close above standard-height tables.
- Available for permanent or mobile installation to suit different terrace requirements.
- Offset configuration positions the mast away from the centre, creating more usable furniture space.

FABRICS & OPTIONAL EQUIPMENT

- Water-repellent, highly UV-resistant solution-dyed acrylic fabrics in approximately 40 colours.
- Fire-retardant, easy-clean PVC fabric options for locations with specific operational needs.
- Infrared heating and LED lighting options support comfortable, extended terrace use.
- Linking gutters, side curtains and bespoke branding enable a coordinated outdoor scheme.

EXPERT PROJECT SUPPORT

Morton Parasols can advise on size, configuration, fixing, fabric and optional equipment, helping each Schattello installation meet the practical demands of its location.
