

StrongWind Parasol

01

STRONG WIND *from Morton Commercial Parasols*

Our Strong Wind parasol is made to withstand the elements in exposed locations such as coastal areas, on roof terraces and in high altitude regions.

This parasol was specifically developed for extremely windy locations and tested in a wind tunnel. Reinforced arms, exceptionally stable hinge points and an extremely strong mast, this parasol to defy wind speeds of up to 102 km/h.

The gearbox and spindle mechanism located inside the mast can be operated via crank handle or crank pin, and as with all of our ranges, the entire frame is raised while closing the canopy. Depending on your individual requirements, the Strong Wind parasol can be installed using concrete foundations with in-ground sleeves or deck plates.

Performance & Construction

02

Characteristics

- Wind tunnel tested
- Reinforced edition
- Streamlined construction
- Ideal for windy locations

Specifications

Sizes:	3m - 8m
Shaded area:	7 m ² - 50 m ²
Mast:	TS = ø 80 mm, TXS + TX = ø 110 mm
Mast thickness:	4 - 5 mm
Arms:	45x25x2 - 56x31x2,5 mm
Operation:	crank handle; crank pin

Sizes, Clearances & Wind Ratings

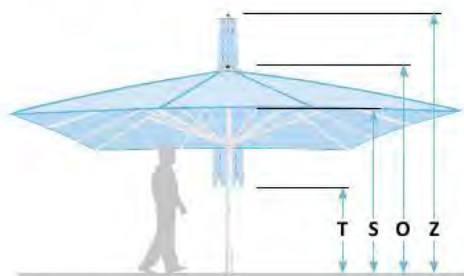

03

The type TS/TXS and TX umbrellas are available in more than 20 different sizes. The table shows all standard sizes. Additional sizes are available on request.

We have the perfect solution for every application.

Available as:

- Type TS
80 mm Mast
102 km/h
- Type TXS
110 mm Mast
102 km/h
- Type TX
110 mm Mast
70 km/h
