

STRONGWIND

Wind-Certified Parasol

A fully certified commercial parasol engineered for exposed terraces, coastal sites and other demanding outdoor environments.

UP TO 102km/h
Wind-tunnel certified

3–6.5 METRES
Extensive canopy range

TELESCOPIC CLOSE
Table clearance

CERTIFIED WIND PERFORMANCE

- Fully wind-certified commercial parasol manufactured by Uhlmann for demanding outdoor environments
- Tested in a wind tunnel and certified for wind speeds of up to 102km/h (63mph)
- Particularly suited to exposed coastal locations, rooftop terraces and high-altitude settings
- Exceptionally strong mast, reinforced arms and highly stable hinge points resist sudden gusts

ENGINEERING & OPERATION

- Toughened-aluminium spokes provide dependable strength under challenging conditions
- Spring-tensioned spokes keep the fabric taut and help prolong the canopy’s working life
- Stainless-steel fittings are used throughout for strength and corrosion resistance
- Available in square, rectangular and octagonal shapes, with sizes from 3 to 6.5 metres

FABRIC & OPTIONS

- Removable crank handle provides smooth and straightforward canopy operation
- Telescopic system allows the canopy to close above standard-height tables
- Premium solution-dyed acrylic fabric offers water repellence, intensive UV protection and around 20 colour choices
- Optional infrared heating, LED lighting, linking gutters, side curtains and protective covers

EXPERT PROJECT SUPPORT
